flexible strip

It can be used in any form, with or without profile, with the possibility of developing cylindrical brushes.

Fontboté

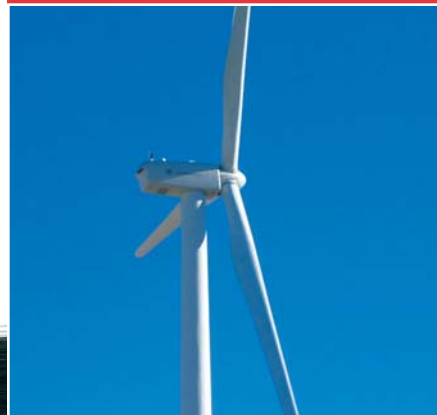

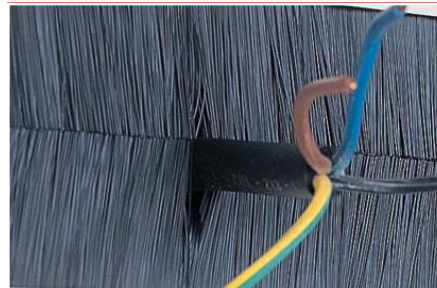

R A S P A L L S T È C N I C S

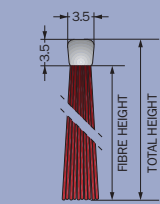

The new flexible strip by fusion, opens a large range of applications thanks to its total flexibility and the homogeneous composition of the material of production.

The main advantages of this new product are:

- Simplicity and speed of assembly.
- Highest development.
- Easy to cut, only with scissors.
- Recycling optimal characteristics.
- It doesn't produce rust.
- Easy to transport and store (rolled packaging).
